Elaboration and characterization of a piezoelectric ceramic resonator

A.Khiat, M.Kadri, S.Hamzaoui

Abstract : In this work. We Synthesized PbTiO_3 from PbO and TiO_2 oxides from Solid state reaction and we studied the development and manufacture of solid piezoelectric resonator of PT. We played on parameter as sintering time. We used XRD and SEM for morphological characterization and Analyzer for impedance piezoelectric characterization.

Keywords : PT, ferroelectric, resonator, impedance, XRD, SEM
