

Manufacturing Nanostructured and Microstructured Chitosan Prepared By Milling Shrimp Shell

OULD BRAHIM Insaf, Belmedani Mohamed, Hadoun Hocine, Belgacem Ahmed, Haddad Ahmed

Abstract: Nano-products are of great interest in the field of pharmaceutical, corrosion, medicine and engineering. This research aimed to produce nano-chitosan. Nanocrystallite. Shrimp shells have been prepared by using a high-energy planetary ball with an optimal rotational speed. The raw material was subjected to standard chemical processing for chitin extraction, followed by deacetylation to obtain nanocrystallite chitosan, which is characterized by Scanning Electron Microscope SEM Fourier Transform Infrared Spectrometry FT-IR and X-ray diffraction (XRD)

Keywords : Shrimp shell, Planetary milling, chitosan, SEM, FT-IR, XRD
